"STAGE 5"

Stage 5 is a component within Guardian Platform designed to provide projects and enthusiasts with a maximum amount of project-level detail. Projects post and manage their own information and earn higher Stage 5 ratings when they increase the information provided on their details page. Stage 5 is designed to provide platform users with a comprehensive collection of data and links all in one location.

What stage is your project at?
Show us.

A New Standard.

Guardian Platform is unlike CMC and CG. All projects should have the opportunity to share their project's information and data with industry enthusiasts. There is no need to limit the public's access to information that helps them make their own financial decisions. Listing on the Guardian Platform does not hinge on meeting unstated "requirements" such as transaction volume, holder count, and social media "followers". Providing users with as much data as possible empowers them to make their own decisions while giving projects a chance to share data.

**MAX INFO – ONE LOCATION – PROJECT MANAGED.**

"Stage 5"

From Guardian Platform

Climb the ladder and earn higher Stage 5 ratings by providing the crypto community with maximum information, data, links, and details.
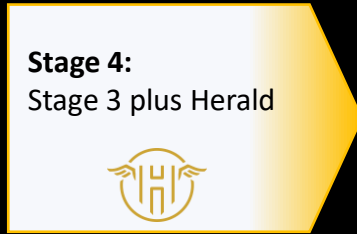

Stage 1:
Project Name
Project Description
Website Address
Email Address

Stage 2:
Stage 1 plus socials

Stage 3:
Stage 2 plus a launched asset with tokenomics, links, supply, taxes, etc.

Stage 4:
Stage 3 plus Herald

Stage 5:
Stage 4 plus BrainStem (coming soon)

Stage Max:
Awarded when all primary data fields are populated with active links and data

~Integration Layer~

Token Data

Herald

BrainStem

Token Strength

"STAGE 5"

Early Adopters

These are the first projects to utilize Stage 5, clearly demonstrating that they place a high value in sharing their project information at all stages of growth.
